

Advances In Geophysics Volume 9

Advances In Geophysics Volume 9

The purpose of this article is to describe our current understanding of where, how, when, and why natural diamonds have been formed. This article reviews currently accepted areas of knowledge, along with topics that are still the subject of ongoing research, where science does not yet have all the answers.

Recent Advances in Understanding the Geology of Diamonds ...

View booking information. Seismic Through the Asset Lifecycle - Sharing Advances in Geophysics. Technical Programme available now. Click here.. Seismic 2019 will explore the entire spectrum of seismic technology from exploration through development and production to abandonment - the lifecycle of the asset.

The history of medicine shows how societies have changed in their approach to illness and disease from ancient times to the present. Early medical traditions include those of Babylon, China, Egypt and India. The Indians introduced the concepts of medical diagnosis, prognosis, and advanced medical ethics. The Hippocratic Oath was written in ancient Greece in the 5th century BCE, and is a direct ...

The history of statistics in the modern sense originates from the term statistics, coined in 1749 in Germany. Although there have been changes to the interpretation of the word over time. The development of statistics is intimately connected on the one hand with the development of sovereign states, particularly European states following the Peace of Westphalia (1648); and the other hand with ...

Rock Physics provides the connections between elastic properties measured at the surface of the earth, within the borehole environment or in the laboratory with the intrinsic properties of rocks, such as mineralogy, porosity, pore shapes, pore fluids, pore pressures, permeability, viscosity, stresses and overall architecture such as laminations and fractures.

International Association of Rock Physicists

This issue covers the new and emerging area of cellulose nanotechnology. The papers presented demonstrate how cellulose nanofibers can be extracted from the cell walls of plants and then be utilised for a wide range of applications.
