2011 Key Stage 2 Reading Papers - Caves and Caving by eric ...

ago. It's a swallet — a cave formed where a stream goes underground. Tucked away in a hollow in the dale, the entrance is comfortingly big, wide and tall enough for three to walk upright. But it's deceptive. Within yards, the light from the blustery day outside has evaporated and the cave becomes narrow, maze-like, mysterious.

Caving. In contrast, speleology is the scientific study of caves and the cave environment. The

challenges involved in caving vary according to the cave being visited, but – in addition to the total absence of light beyond the entrance – often include the negotiation of pitches, squeezes, and water hazards.

Caving - Wikipedia

Caving is the art of safely moving through a natural cave to a destination and returning to the surface without hurting yourself or the cave. In order to explore safely, you will need the right equipment and the right skills.
