Component Max Resolution

A media query is a logical expression that is either true or false. A media query is true if the media type of the media query matches the media type of the device where the user agent is running (as defined in the "Applies to" line), and all expressions in the media query are true.

Media Queries - w3.org

Optical resolution describes the ability of an imaging system to resolve detail in the object that is being imaged.. An imaging system may have many individual components including a lens and recording and display components. Each of these contributes to the optical resolution of the system, as will the environment in which the imaging is done.

Optical resolution - Wikipedia

The following features are at-risk, and may be dropped during the CR period: toggle(), attr() "At-risk" is a W3C Process term-of-art, and does not necessarily imply that the feature is in danger of being dropped or delayed.
