**Dark Matter**

Dark matter is a form of matter that is thought to account for approximately 85% of the matter in the universe and about a quarter of its total energy density. The majority of dark matter is thought to be non-baryonic in nature, possibly being composed of some as-yet undiscovered subatomic particles. Its presence is implied in a variety of astrophysical observations, including gravitational ...

Dark matter emits no light, and cannot be directly observed, but scientists think that it and dark energy make up most of the mass of the universe.

**What is Dark Matter? | Space**

What is dark energy? More is unknown than is known — we know how much there is, and we know some of its properties; other than that, dark energy is a mystery — but an important one. Roughly 70% of the Universe is made of dark energy. Dark matter makes up about 25%. The rest - everything on Earth, everything ever observed with all of our instruments, all normal matter adds up to less than 5 ...

**Dark Energy, Dark Matter | Science Mission Directorate**

Dark matter, a component of the universe whose presence is discerned from its gravitational attraction rather than its luminosity. Dark matter makes up 30.1 percent of the matter-energy composition of the universe; the rest is dark energy (69.4 percent) and “ordinary” visible matter (0.5 percent).

In *Dark Matter*, the crew of a derelict spaceship is awakened from stasis with no memories of who they are or how they got on board. Facing threats at every turn, they have to work together to survive a voyage charged with vengeance, betrayal and hidden secrets.

**Dark Matter | SYFY**

Dark matter. Unlike normal matter, dark matter does not interact with the electromagnetic force. This means it does not absorb, reflect or emit light, making it extremely hard to spot. In fact, researchers have been able to infer the existence of dark matter only from the gravitational effect it seems to have on visible matter. Dark matter ...
