

Farming On The Edge Saving Family Farms In Marin County

Farming On The Edge Saving

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

In most countries in the Asian region, ruminant animals, particularly cattle and buffalo, have an important economic role in village farming systems to provide milk, draught power, manure, meat and hides. Milk is an important constituent in the diet of large populations in countries like India and Pakistan. Its value is being increasingly recognized in other countries in the region too.
