How to split data into multiple worksheets by rows count in Excel? For example, I have a range of data list, now I want to split it into multiple worksheets by rows count, in this example, I will split it by every 5 rows (see following screenshots).

How to split data into multiple worksheets by rows count ...

The main difference between one-step equations and two-step equations is that one more step you need to do in order to solve a two-step equation. That additional step may be something like multiplying the variable by a certain number to get rid of a fraction in front of it. Otherwise, the rules are the same as before and these equations are just as easy to learn and solve as are the one-step ones
