Connect to all your data. Smart Hadoop ETL starts with the right connectivity to leverage all your data. Unleash Hadoop's potential with high-performance connectivity to move data into and out of Hadoop from virtually any system.

Hadoop ETL Solutions from Syncsort

Panoply is the only smart data warehouse that automates and simplifies all three key aspects of the data lifecycle i.e. data integration, data management, and query performance optimization.. Panoply allows you to ingest data from any source with just a few clicks. This takes minutes not days, which means business users no longer depend on IT/Data Engineering for ETL processes.

Top 10 Popular Data Warehouse Tools and Testing Technologies

Data-centric programming language defines a category of programming languages where the primary function is the management and manipulation of data. A data-centric programming language includes built-in processing primitives for accessing data stored in sets, tables, lists, and other data structures and databases, and for specific manipulation and transformation of data required by a ...

In this detailed guide and tutorial for analysts on the basics of Tableau, you'll learn how to create amazing dashboards and analyses using Tableau.

What is Tableau? - A guide and tutorial for analysts

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques.. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.
