Gluten (from Latin gluten, "glue") is a group of proteins, called prolamins and glutelins, which occur with starch in the endosperm of various cereal grains. This protein complex comprises 75-85% of the total protein in bread wheat. It is found in related wheat species and hybrids, such as spelt, khorasan, emmer, einkorn, and triticale; barley, rye, and oats as well as products derived from ...

Here's what Dr. William Davis, author of Wheat Belly, has to say about these unhealthy alternatives... "These powdered starches are among the few foods that increase blood sugar higher than even whole wheat. It means these foods trigger weight gain in the abdomen, increased blood sugars, insulin resistance, diabetes, cataracts, and arthritis.
