

Ultrasonography In Ophthalmology 18

Ultrasonography In Ophthalmology 18

Medical ultrasound (also known as diagnostic sonography or ultrasonography) is a diagnostic imaging technique based on the application of ultrasound. It is used to create an image of internal body structures such as tendons, muscles, joints, blood vessels, and internal organs. Its aim is often to find a source of a disease or to exclude pathology. The practice of examining pregnant women using ...

Optic nerve head drusen (ONHD) are globular, often calcified, hyaline bodies located within the optic nerve head. The incidence of ONHD is 3.4 per 1000 in clinical studies; however, a higher rate of 10 to 20 per 1000 has been reported in autopsy studies. Pedigree studies suggest that drusen of the optic disc is a hereditary anomaly most compatible with the theory of irregular dominance, based ...

INTRODUCTION. Retinoblastoma is the most common primary intraocular malignancy of childhood and accounts for 10 to 15 percent of cancers that occur within the first year of life [1]. Retinoblastoma typically presents as leukocoria in a child under the age of two years. Untreated retinoblastoma is a deadly disease; however, with advances in treatment, survival in the contemporary era is >95 percent.
